Subject: POTENTIAL DATES - Next Update on TCW Aquatic Toxicity Industry-Wide Project

All –

Despite all of the external concerns and response efforts to COVID-19, the TCW JIP is continuing to capture samples and conduct WET testing. As of today, offshore operations continue and our third-party labs remain in operation (however, that may change, like many other industries, as conditions continue to develop).

The industry study team would like to provide an update to EPA on the project in late-April.

Please let me know your availability for the following dates and times:

- 1 – April 27, 1:00-2:30 Central
- 2 – April 29, 11:00-12:30 Central
- 3 – April 29, 1:30-3:00 Central
- 4 – April 30, 1:00-2:30 Central

Thanks in advance for your responses.

Greg Southworth

Associate Director
Offshore Operators Committee

Office: 504.904.7966

NOTE: Until further notice OOC New Orleans staff will be teleworking to promote social distancing. The OOC Kenner office is effectively closed (but we are still working!). Please contact me via email or cell. Thanks!
